

Purpose: Getting sponsors in an offline mode and getting them in contact with the event organizers has always been a concern. The sole purpose is to maximize the profit for any individual sponsoring an event, which can be achieved only if the sponsor is well acquainted with the trends of the business that is the profit associated with the different types of events. This can happen only if the sponsor has complete data on the different kinds of events. Thus, having a website makes the process time-saving and easier for both the sponsors and the event organizers. Even with the internet revolution at its peak, there is an inadequacy of websites that has the event organizers and sponsors in one place and at the same time provides guest booking.

Description: The purpose of this project is to automate the process of making sponsorship decisions and securing access to timely sponsorship. It is designed to cater to the people looking to venture into event management and companies looking to sponsor events. Across the city, a lot of different kinds of events are organized throughout the year. Usually, it is observed that event management teams find it difficult to find the sponsors for the event as they do not know where to look and vice-versa. The website looks to eliminate this problem.

The main aim of the website is to provide a common platform to like-minded event organizers and sponsors to make the process of putting together an event easier and smoother.
